FORM A.
BRITISH RAINFALL.

21 JAN 1918

REGISTER OF RAINFALL IN 1917.

Kept at Dyrham Park Gdns.
in the County of Hertfordshire
by A. Juniper

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Barnet
Diameter of Funnel of Rain Gauge 5. in.
Height of top of Gauge above Ground 1. ft. — in.
" " " " Sea Level 310. ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

EXPL

REGISTER OF RAINFALL IN 1918

FORM A2.
BRITISH RAINFALL.

Kept at Heathwall Pumping Station

in the County of London

by London County Council

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 40 ft. 0 in.
" " " Sea Level 54·50 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Vauxhall (L&SW RY)
Distance 1200 yds Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1914

BRITISH RAINFALL FORM 116
11 MAR 1915

Kept at Camden Square
in the County of London
by Dr H R Mill

Lat. .... Long. ....
Time of Observation 9 a.m.
Nearest Railway Station Camden Rd
Diameter of Rain Gauge 8 in. (Snow Gauge)
Height of top of Gauge above Ground 3 ft. 5 in.
" " " " Sea Level 113 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.
24 JAN 19

REGISTER OF RAINFALL IN 1915

Kept at Spring Gardens.

in the County of London

by The London County Council

2

Lat. Long.

Time of Observation 9.0 am

Nearest Railway Station Trafalgar Square

Diameter of Funnel of Rain Gauge 7 11/16 in.

Height of top of Gauge above Ground 6 ft. - in.

" " " " Sea Level 34.98 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1914

FORM A.
BRITISH RAINFALL.
29 JAN 1915

Kept at Lot's Road Pumping Station
in the County of London
by The London County Council

Lat. Long.
Time of Observation 9.0 a.m
Nearest Railway Station Chelsea
Diameter of Rain Gauge 8 in.
Height of top of Gauge above Ground 33 ft. 6 in.
" " " " Sea Level 53·5 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

CLAPHAM, S.W.4.

March 17. 1921

Dear Mr Glasspoole

Thanks for your Card & note; it was a stupid blunder in addition & should have been 3 30.

I have had the Gauge lowered to 12 inches above the Ground & I am daily comparing my results with the data given in "the Times" at Kensington & so far there is a very close agreement.

Yours sincerely

H W Prentice

J Glasspoole Esq

BRITISH RAINFALL.
17 JAN 1912

R

2

Kept at Clapton Pond, Clapton N.E.

in the County of London

by Norman Georgie, M.I.C.E.

RAIN GAUGE
Pattern Negretti & Zambra's self recording
Diameter of top 8" in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 70·47 ft.

Time of Observation 9·0 A.M.

Nearest Railway Station
Name Clapton G.E.Ry.
Distance 3/8 mile Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Dear Sir,

I am in receipt of yours of yesterday's date and regret an error crept into the return which I furnished you with.

The rainfall for the 28th December should be 1.17" and not .17.

Yours faithfully,

Norman Scorgie

Used on Abstract

January 8th, 1916.

Dear Sir,

Rainfall.

I herewith forward you a copy of the record of rainfall for the month of December, 1915, taken at Clapton Pond, Clapton, and should be obliged if you would kindly compare the figures with those registered at other gauges in the district.

Thanking you in anticipation,

Yours faithfully,

Norman Scorgie

REGISTER OF RAINFALL IN 1917

FORM A. BRITISH RAINFALL.

26. JAN 1918

Kept at New River Yard
in the County of London L. B. Thames
by M. W. B.

Lat. ________ Long. ________
Time of Observation ________
Nearest Railway Station ________
Diameter of Funnel of Rain Gauge ________ in.
Height of top of Gauge above Ground ________ ft. ________ in.
" " " " Sea Level ________ ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1919.

13 FEB 20

Kept at Park Keepers Cottage
Barrington Road, Crouch End
in the County of Middlesex
The Corporation of Hornsey
by Mr. E. J. Lovegrove
Borough Engineer & Surveyor

Lat. 51° 35' 1" N Long. 0° 7' 26" W
Time of Observation 9 a.m.
Nearest Railway Station Crouch End
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 3 ft. 10 in.
" " " " Sea Level 122 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following. ·00

Records taken in Millimetres should not be entered on this form.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. BRITISH RAINFALL.

27.1.19

Kept at Telegraph Hill

in the County of London, Thames R. B

by E. Serace

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1919.

Kept at Deptford Pumping Station

in the County of London

by the London County Council

Lat. Long. Information

Time of Observation already given.

Nearest Railway Station -

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in *"Rules for Rainfall Observers,"* sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 900 yds Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1915

FORM A.
BRITISH RAINFALL

3. JAN 1916

Kept at Carisbrooke, Enfield

in the County of Middlesex 2

by John McEwan

Lat. 51°38'55N Long. –5'15" W

Time of Observation 8 am.

Nearest Railway Station Enfield GNR

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground — ft. 12 in.

" " " " Sea Level 204 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

JOHN McEWAN

TELEPHONE
71 ENFIELD.

CARISBROOKE,
ENFIELD.

21st. January 1921.

Dear Sir,

You will oblige by looking through my daily rainfall report for last year and comparing the entry of 14th. September .93 in. with other records in this district. It has been queried by a very near neighbour of mine, who does not report to you, and it may be altogether incorrect. I had to be away over night when the record was taken and I queried it with my gardener on my return, but he was perfectly confident about having had to measure the amount, because of having to turn out half an inch from the gauge glass and to refill to nearly the top. The circumstances did not look to me as if there had been such a heavy rainfall, and it had been very light where I spent the night. If you can find no corroboration of the heavy amount, in the district, I think I am prepared to delete the figure and substitute for it the nearest reliable one.

Yours faithfully,
John McEwan

The Secretary.
Meteorological Office.

CARISBROOKE,
ENFIELD.

29th. January 1921.

S.598.

Dear Mr. Salter.

I am much obliged for your letter of 25th. January and have made the correction of rainfall to .23 instead of .93 I have two neighbours in the actual road I live in who keep rain guages, but neither feel sufficiently confident in the accuracy of their records to send them in to you. I shall however discuss the matter with them again and see what can be done.

Best regards,

Yours sincerely,

John McEwan

Form A. 1. **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

REGISTER OF RAINFALL IN 1919.

JAN

Kept at Public Offices Enfield
in the County of Middlesex.
by Observers for Dr. Warren M.O.H.

Lat. 51° 0′ Long. 0° 10′
Time of Observation 9-0 am.
Nearest Railway Station Enfield Town G.E.Ry & Enfield G.N.Ry.
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 43 ft. 0 in.
" " " " Sea Level 148 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Record used in M.W.R at Carisbrooke Enfield

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1914

FORM A.
BRITISH RAINFALL.
22 JAN 1915

Kept at Recreation Ground Church End, Finchley
in the County of Middlesex
by Finchley Urban District Council

Lat. Long.
Time of Observation 9 a.m
Nearest Railway Station Church End, Finchley
Diameter of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 11 in.
" " " " Sea Level 273 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

The Superintendent.
British Rainfall Organization,
62 Camden Square, N.W.1.

Dear Sir,

RAINFALL RETURN. 1919.

I have yours of the 22nd. inst. and think there is no doubt that the figures as shewn in red are the accurate ones.

I much regret the error, but in consequence of the war, we have been working under very difficult conditions with a depleted Staff, and I have personally only just returned after four years on active service.

Yours faithfully,

Chas J. Jenkin

Engineer and Surveyor.

0 JAN 1921

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at FOREST HILL RESERVOIR

in the County of LONDON

by METROPOLITAN WATER BOARD. (SOUTHERN DISTRICT).

Lat. Long.

Time of Observation 9 a.m.

Nearest Railway Station

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 3 ft. 3 in.

" " " " Sea Level 340 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

9 JAN 1921

Form A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at 1 Acfold Rd., Fulham
in the County of LONDON
by Mrs. H. W. Carter

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

before

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.
19. JAN 1917

Kept at 33 Highfield Avenue
Golders Green.
in the County of Middlesex
by A. E. Payne.

Lat. Long.
Time of Observation 9 am.
Nearest Railway Station
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. – in.
" " " " Sea Level 175. ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1913

FORM A.
BRITISH RAINFALL.

8- JAN 1914

Kept at *Royal Observatory, Greenwich*
in the County of *London*
by *the Astronomer Royal.*

Lat. 51·28·38 N Long. 0·0·0 E
Time of Observation 9 a.m.
Nearest Railway Station
Diameter of Rain Gauge 8 in.
Height of top of Gauge above Ground — ft. 5 in.
" " " " Sea Level 149 ft. 6 in

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A.
BRITISH RAINFALL.

19 FEB 1916

REGISTER OF RAINFALL IN 1915

Kept at Royal Observatory Greenwich 8

in the County of (London) Kent

by Astronomer Royal

Lat. 51·28 Long. 0·0

Time of Observation 9 a.m.

Nearest Railway Station Greenwich Park & Maze Hill

Diameter of Funnel of Rain Gauge 8 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

" " " " Sea Level 150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

15 JAN 20

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1919.

Kept at "Royal Observatory," Greenwich

in the County of London.

by

Lat. 51° 28′ 38″ Long. 0° 0′ 0″

Time of Observation 9.

Nearest Railway Station Greenwich Station.

Diameter of Funnel of Rain Gauge 8. in.

Height of top of Gauge above Ground ft. 5 in.

" " " " Sea Level 150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at Greenwich (Royal Obs.) (MD)
in the County of London
by The Astronomer Royal

Lat. 51° 28′ Long. 0° 0′
Time of Observation 9h G.M.T.
Nearest Railway Station
Diameter of Funnel of Rain Gauge .... in.
Height of top of Gauge above Ground .... ft. .... in.
,, ,, ,, ,, Sea Level 149 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in *"Rules for Rainfall Observers,"* sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1. following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.
9 JAN 1917

040

Kept at Camlot

in the County of Hertfordshire [illegible]

by Miss Paget

per Frances A. Mellor.

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 8th 1917

Obit

Dear Sir

I enclose the Register of rainfall for the year 1916. My Aunt Miss A. Paget who attended to this, died last Autumn and I am afraid there is some confusion. I cannot trouble Miss Paget about the matter, as she is far from well.

I was under the impression that the gardener who
